

Ritta Sweta

FULL STACK SOFTWARE DEVELOPER

EXPERIENCE

SAVANNAH INFORMATICS LIMITED, *Nairobi, Kenya*

Software Engineer, March, 2024 – Present

- Developing and integrating Auto Reconciliation workflows, ensuring healthcare providers receive accurate payments from payers for services rendered. This solution minimizes revenue leakage and enhances visibility into lost revenue
- Primary Health Care (PHC) workflows for the Social Health Act (SHA), ensuring restricted access to interventions based on facility level. This initiative aligned with Kenya's healthcare goals of providing accessible and affordable health services, with a particular focus on free PHC programs for underserved populations
- Integrated eTIMS workflow to streamline invoice generation for providers, ensuring compliance with KRA regulations and reducing rejection rates by payers
- Implemented Inventory Adjustment workflow empowering providers to accurately manage their stock

EQUIPE TECHNIQUE, *Remote*

Software Developer, September, 2022 – December, 2022

- Developed an application that empowers users to create their own e-commerce websites effortlessly, similar to Shopify, without requiring them to have any coding knowledge
- Developed and maintained the backend infrastructure for a SaaS e-commerce platform using Ruby on Rails
- Authored informative and engaging blog articles that highlighted the unique solutions and capabilities of the company, increasing website traffic

VIRTUAL PAY, *Nairobi, Kenya*

Software Developer, May, 2022 – September, 2022

- Developed and enhanced the company's payment gateway to improve visibility for users, making it easier to monitor transactions and ensure secure, seamless financial operations
- Developed and maintained documentation for end-users and internal teams, contributing to the successful adoption and usage of the company's products
- Collaborated with the marketing, sales, and service delivery teams to develop and deliver customer-centric apps, resulting in increased client acquisition and retention

JUUBIX, *Remote*

Global Techsprint Leadership Program, January, 2022 – May, 2022

- Created and presented ERD diagrams and detailed presentations to effectively communicate the logic and requirements of the Juubix app to the development team, resulting in a deeper understanding of the project
- Conducted thorough research to identify and update missing skills and interests in the Juubix app, resulting in a more comprehensive and accurate
