

Ritta Sweta

FULL STACK SOFTWARE ENGINEER

EXPERIENCE

SAVANNAH INFORMATICS LIMITED, *Nairobi, Kenya*

Frontend Software Engineer, March, 2024 – Present

Technologies: Angular, AngularJS, NextJs, TailwindCSS, Jest, REST API

- Implemented **biometric fingerprint capture** for accurate patient identification, reducing impersonation and curbing insurance misuse
- Engineered a unique **HealthID system** that gives each patient a single verified identity across facilities, enabling one-time biometric enrollment, unified insurance lookup for billing, and cross-facility access to medical records
- Built an **Auto Reconciliation module** that catches and explains gaps between what healthcare providers bill insurers and what insurers actually pay, turning silent revenue leakage into recoverable revenue
- Optimized **primary healthcare workflows** under Kenya's Social Health Act, ensuring services were delivered according to facility capacity and national guidelines in support of universal health coverage and free primary care access
- Developed an **eTIMS integration** to streamline invoice generation for providers, ensuring KRA compliance and reducing payer rejection rates

HIGHLIGHTED PERSONAL PROJECTS, *Remote*

FullStack Software Engineer, January, 2023 – February, 2024

- [Pearls Collections](#) - An online ecommerce shop integrated with Stripe payment
Built with: Next.js, TailwindCSS, Stripe, MongoDB, Cloudinary, Sentry
- [Pearls Collections](#) - An online ecommerce shop integrated with Stripe payment
Built with: Next.js, TailwindCSS, Stripe, MongoDB, Cloudinary, Sentry
- [Thamani Stays](#) - Accommodation online booking platform
Built with: MERN(MongoDB, Express.js, React.js, Node.js) Stack, Redux Toolkit, TailwindCSS, Stripe Payment, Cloudinary, Sentry

EQUIPE TECHNIQUE, *Remote*

Software Developer, September, 2022 – December, 2022

Technologies: React, JavaScript, Ruby on Rails

- **Developed a no-code e-commerce platform** that allows users to create fully functional online stores effortlessly, **similar to Shopify**, without requiring any coding knowledge
- **Screened candidates for Equipe Technique's global talent pool**, assessing GitHub contributions, open-source participation, and technical expertise to ensure high-quality selections
- **Authored engaging blog content** showcasing the company's unique solutions and capabilities, **driving increased website traffic** and brand visibility

VIRTUAL PAY, *Nairobi, Kenya*

Software Developer, May, 2022 – September, 2022

Technologies: Django, Python, Payment Gateways, Docker

- **Built and optimized a Stripe-like payment gateway**, enhancing transaction visibility for users and enabling **secure, seamless financial operations**

[Portfolio](#)

SKILLS

Front-End: React.js, Next.js, JavaScript, Angular, AngularJS, TypeScript, Redux Toolkit, React Query, Tailwind CSS, Material UI, Bootstrap

Back-End: Node.js, Express.js, Ruby on Rails

Databases: MongoDB, PostgreSQL, MySQL

Testing: Jest, Vitest, React Testing Library

Authentication & Security: JWT, OAuth, NextAuth

DevOps & Deployment: Git, GitHub, GitLab, CI/CD pipelines, Vercel, Netlify, Heroku

Tools & Integrations: Sentry, Stripe (Payments & Webhooks), Clerk, Cloudinary, Shopify, Jira, Slack

Methodologies: Agile (Scrum, Kanban)

PROJECTS

[Pizza Bites](#)

- Integrated with stripe (payment and webhooks) for seamless online payments
- Built with Next.js, NextAuth, React, Tailwind CSS, Stripe, Stripe Webhooks, Cloudinary,

- **Created and maintained comprehensive documentation** for end-users and internal teams, **facilitating successful product adoption and usage**
- **Collaborated with marketing, sales, and service delivery teams** to design and deliver customer-centric applications, **driving increased client acquisition and retention**

JUUBIX, *Remote*

Global Techsprint Leadership Program, January, 2022 – May, 2022

Technologies: React, JavaScript, Ruby on Rails, Web3

- **Collaborated directly with the Founder & CEO** during the early ideation phase of JUUBIX, a **fintech/Web3 collaboration marketplace**
- **Designed and presented ERD diagrams and detailed presentations**, clearly communicating app logic and requirements to the development team, **ensuring a shared understanding of the project vision**
- **Developed a comprehensive skills and interests framework**, mapping all potential stakeholder personas within the JUUBIX ecosystem
- **Conceptualized the matching logic connecting startups, talent, investors, and companies**, implementing a **“Tinder for business” model** to streamline collaboration

MICROVERSE, *Remote*

Mentor (Volunteer), June, 2020 – September, 2020

Technologies: React, JavaScript, Ruby, Ruby on Rails, HTML5, CSS3

- **Mentored junior web developers** through detailed code reviews, improving project architecture, strengthening coding practices, and supporting their career growth
- **Proposed enhancements to code organization**, boosting code quality, maintainability, and overall application performance
- **Provided guidance on motivation and professional development**, helping mentees maintain engagement and achieve long-term success in the program

EDUCATION

MICROVERSE, January, 2020 – May, 2022

Remote Full Stack Web Development Program, Full Time

- Completed **1300+ hours of hands-on coding**, mastering algorithms, data structures, and full-stack development
- Built multiple projects using **Ruby, Ruby on Rails, JavaScript, React, Redux, HTML5, CSS and Bootstrap**
- Collaborated remotely with international peers through daily standups, GitHub projects, and agile workflows

TAITA TAVETA UNIVERSITY, September, 2014 – November, 2018

BSc. Mathematics and Computer Science

- Completed 1100+ hours of applied mathematics coursework, building strong analytical and problem-solving skills
- Developed a solid foundation in both theoretical and practical aspects of computer science
- Gained experience in logical reasoning through rigorous mathematics and computer science coursework

postgreSQL,
DrizzleORM, Sentry

[Pearls Collections](#)

- Ecommerce integrated with stripe(payment and webhooks) for seamless online payments
- Built with Next.js, NextAuth, Tailwind CSS, Stripe, Stripe Webhooks, Cloudinary, MongoDB and Mongoose ODM, Sentry

[Thamani Cars](#)

- Car rental platform for browsing and booking cars online
- Built with MERN Stack(MongoDB, Express.js, React.js, Node.js), Redux Toolkit, React Query, Tailwind CSS, Stripe Payment, Cloudinary, Vitest, React Testing Library, Jsdm, Sentry

[Thamani Stays](#)

- Online platform with unique accommodation
- Built with MERN (MongoDB, Express.js, React.js, Node.js) Stack, Redux Toolkit, Tailwind CSS, Stripe(payments & webhooks) for payment, Sentry
