

Ritta Sweta

FULL STACK SOFTWARE DEVELOPER

EXPERIENCE

SAVANNAH INFORMATICS LIMITED, *Nairobi, Kenya*

Software Engineer, March, 2024 – Present

- Implemented biometric fingerprint enrollment for new patients and verification workflows for returning patients at hospital check-in, reducing impersonation and improving identity assurance
- Developed and integrated Auto Reconciliation workflows, ensuring healthcare providers receive accurate payments from payers for services rendered. This solution minimizes revenue leakage and enhances visibility into lost revenue
- Worked on primary healthcare workflows under Kenya's new national health insurance policy (Social Health Act), ensuring that medical services were delivered according to facility capacity and national guidelines. This work supported the government's universal health coverage goals, expanding access to free primary care for low income populations
- Integrated eTIMS workflow to streamline invoice generation for providers, ensuring compliance with KRA regulations and reducing rejection rates by payers
- Implemented Inventory Adjustment workflows empowering providers to accurately manage their stock

EQUIPE TECHNIQUE, *Remote*

Software Developer, September, 2022 – December, 2022

- Developed an application that empowers users to create their own e-commerce websites effortlessly, similar to Shopify, without requiring them to have any coding knowledge
- Developed and maintained the backend infrastructure for a SaaS e-commerce platform using Ruby on Rails
- Authored informative and engaging blog articles that highlighted the unique solutions and capabilities of the company, increasing website traffic

VIRTUAL PAY, *Nairobi, Kenya*

Software Developer, May, 2022 – September, 2022

- Developed and enhanced the company's payment gateway to improve visibility for users, making it easier to monitor transactions and ensure secure, seamless financial operations
- Developed and maintained documentation for end-users and internal teams, contributing to the successful adoption and usage of the company's products
- Collaborated with the marketing, sales, and service delivery teams to develop and deliver customer-centric apps, resulting in increased client acquisition and retention

JUUBIX, *Remote*

Global Techsprint Leadership Program, January, 2022 – May, 2022

- Created and presented ERD diagrams and detailed presentations to effectively communicate the logic and requirements of the Juubix app to the development team, resulting in a deeper understanding of the project

SKILLS

Front-End: React.js, Next.js, JavaScript, Angular, Angular JS, TypeScript, Redux Toolkit, Tailwind CSS, Material UI, Bootstrap

Back-End: Node.js, Express.js, Ruby on Rails, Django

Databases: PostgreSQL, MongoDB, MySQL

Testing: Jest, Vitest, React Testing Library, RSpec

Authentication & Security: JWT, OAuth

Tools & Methods: Git, GitHub, GitLab, CI/CD pipelines, Jira, Stripe (Payments & Webhooks), Clerk, Cloudinary, Vercel, Netlify, Heroku, Shopify

PROJECTS

[Online Store Shop](#)

- Ecommerce integrated with stripe(payment and webhooks) for seamless online payments
- Built with Next.js, NextAuth, Tailwind CSS, Stripe, Stripe Webhooks, Cloudinary, MongoDB and Mongoose ODM

[Airbnb](#)

- Online platform with unique accommodation

- Conducted thorough research to identify and update missing skills and interests in the Juubix app, resulting in a more comprehensive and accurate representation of users' skills and interests, improving the ability to match users with similar profiles
- Developed and implemented front-end features using React

MICROVERSE, *Remote*

Mentor (Volunteer), June, 2020 – September, 2020

- Mentored two junior developers by conducting detailed code reviews, resulting in cleaner project architecture and stronger coding practices; both have since advanced in their software development careers
- Proposed improvements to code organization to improve code quality and overall performance
- Provided advice and tips on how to maintain motivation to maintain longevity in the program

EDUCATION

MICROVERSE, January 2020 – May 2022

Remote Full Stack Web Development Program, Full Time

- Completed **1300+ hours of hands-on coding**, mastering algorithms, data structures, and full-stack development
- Built multiple projects using **Ruby, Ruby on Rails, JavaScript, React, Redux, HTML5, CSS and Bootstrap**
- Collaborated remotely with international peers through daily standups, GitHub projects, and agile workflows
- Mentored fellow students by promoting best coding practices and supporting motivation, contributing to their program success

TAITA TAVETA UNIVERSITY, September 2014 – November 2018

BSc. Mathematics and Computer Science

- Completed 1100+ hours of applied mathematics coursework, building strong analytical and problem-solving skills
- Developed a solid foundation in both theoretical and practical aspects of computer science
- Gained experience in logical reasoning through rigorous mathematics and computer science coursework

- Built with MERN Stack(MongoDB, Express.js, React.js, Node.js), Redux Toolkit, Tailwind CSS, Stripe(payments & webhooks) for payment

[Pearls Thamani Care](#)

- An online healthcare platform that provides patients with easy access to doctors, medical services, and healthcare information

- Built with Next.js, React.js, Material UI, Tailwind CSS
